Certificates

Udemy FullStack Web Development

Projects

Portfolio Website

- Designed and developed a personal portfolio website to showcase my web development projects, including interactive features built with React.js and CSS animations.
- Deployed using GitHub Pages and optimized for both desktop and mobile devices.

E-Commerce Application

- Built a fully functional e-commerce website using React, Node.js, and MongoDB, allowing users to browse products, add items to a cart, and make secure payments.
- Integrated payment API and email notifications for order confirmation.

Weather App

- Created a weather forecasting web application using the OpenWeatherMap API and JavaScript, displaying real-time weather information based on user input location.
